

Dear DYCD,

I recently came upon the senior field supervisor position and was interested by its job description. I have worked under both SYEP and Ladders for Leaders and thought many times during my job of what could have been improved. I am proficient in Microsoft Office programs and have all of the preferred skills listed except for a bachelor's degree, but am pursuing one in computer science at Cornell University. I believe I have an excellent skill set that fits this position. I look forward to discussing my candidacy!
